Profile

As an intern, I gained valuable experience as a **Laravel Developer** while working on an engaging project. I improved my problem-solving skills and honed my ability to develop logical and efficient solutions. **My goal** is to continuously enhance my thinking process and strengthen my programming performance, creating high-quality applications that are both functional and maintainable.

Work Experience

Internship Laravel developer, *Nikolić Technology*

04/2025 – Present

- Contributed to the development of a Laravel-based project by implementing new features.
- Managed tasks from issue assignment to completion.
- Collaborated with the team by integrating shared functionalities and ensuring code consistency across the project.
- Gained hands-on experience with Git workflow.

Projects

Selected Projects:

- **Reservation System (Laravel API):** Developed a RESTful API for managing table reservations, including user authentication, database interactions, and CRUD operations.
- **Real-time Social Platform:** Developed a messaging application with instant voting and commenting using **Laravel Reverb**. Utilized **WebSockets** to ensure seamless, real-time data updates across all users.
- **Weather Forecast Application:** Integrated with a third-party Weather API to display real-time weather data, handling API requests and presenting information to users efficiently.

Education

Self-Taught Web Developer

- Focused on backend development with PHP, Laravel, and MySQL through online courses, tutorials, and hands-on projects.

Continuous Learning

- Expanding knowledge in modern web development practices, API design, and database management by building real-world applications.
